

Berkshire Family YMCA

Pittsfield, MA

Berkshire Family YMCA wanted to add telescopic gymnasium seating to their basketball area but due to the columns in the gym as well as the age of the building they were concerned it was not possible. Corbin Seating was able to partner with Irwin Seating Company and Skanska USA Building to design telescopic seating that would work in the space as well as distribute the weight of the bleachers as not to stress the floor. The refurbished gym now houses four (4) telescopic seating assemblies, with manual operation.

Completed: August 2023
